CONFIDENTIAL COMMERCIAL INFORMATION IF EMERGENCY, CALL 0 800 222 1030 (from Argentina) OR +5411 4341 7000 (other countries)

SECTION 5 – FIRST AID MEASURES		
GENERAL ADVICE:	Avoid exposure to the product, taking appropriate protective measures. Get medical advice.	
EYE CONTACT:	Immediately flush with water for at least 15 minutes, holding eyelids apart to ensure that all eye and lid tissues rinsed. Washing eyes within several seconds is essential to achieve maximum effectiveness. If you have contact lenses, remove them after the first 5 minutes, then continue rinsing eye. Get medical advice. It can cause serious damage to the cornea, conjunctiva or other parts of the eye.	
SKIN CONTACT:	Wash immediately after contact with water for at least 15 minutes. Do not neutralize or use substances other than water. Remove contaminated clothing and wash before reuse.	
INHALATION:	For those providing assistance, avoid exposure. Use proper protection if necessary. Move victim and get fresh air. Keep calm. If not breathing, give artificial respiration. Get medical advice.	
INGESTION:	DO NOT INDUCE VOMITING. Rinse mouth with water. Never give anything by mouth to an unconscious person. Get medical advice. If vomiting occurs spontaneously, place victim on side to reduce the risk of aspiration.	
SYMPTOMS:	Inhalation: may cause respiratory tract irritation. Skin contact: can cause skin burns. Eye contact: can cause burns. Ingestion: may cause burns.	
MEDICAL ADVICE:	Provide symptomatic treatment. For more information, contact a Poison Control Center. Evalúe realizar el tratamiento específico para glicoles.	

	SECTION 5 – FIREFIGHTING MEASURES	
EXTINGUISHING MEDIA:	Use dry chemical, foam (may be required AR-foam), water spray or CO_2 . DO NOT USE water jets.	
FLASH POINT:	24°C (75,2°F) - c.c.	
FLAMMABLE LIMITS:	N/D	
SPECIAL HAZARDS:	FLAMMABLE. The container subjected to heat may explode unexpectedly and project dangerous fragments. Vapours are heavier than air, and may spread along floors. In case of fire may release irritating and/or toxic fumes and gases, such as carbon monoxide, nitrogen oxides and other substances derived from incomplete combustion.	
SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS: Use self-contained breathing apparatus. Structural firefighter clothing provides limited protection in fire situations ONLY; it effective in spill situations. For large spills wear protective clothing against chemical specifically recommended by the manufacturer. It may provide thermal protection.		
ADVICE FOR FIREFIGHTERS:	Spray the packaging with water to avoid ignition or to keep them cool if exposed to excessive heat or fire. Cool containers with water until the fire has extinguished. The hot material can cause violent eruptions when it comes in contact with the water, being able to project itself and cause serious burns.	

SECTION 6 – ACCIDENTAL RELEASE MEASURES		
PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:	Eliminate all ignition sources (no smoking, do not use flares, sparks or flames in immediate area). Stop leak if you can do it without risk. All equipment used when handling the product must be grounded. Do not touch or walk through spilled material. Foam can be used to reduce vapours. Do not allow reuse of spilled product.	
ENVIRONMENTAL PRECAUTIONS:	Contain spilled liquid with a dam or barrier. Prevent entry into navigable waterways, sewers, basements or uncontrolled confined areas.	
CONTAINMENT AND CLEANING UP:	Contain and recover the liquid when possible. Collect the liquid product with sand, vermiculite, earth or inert absorbent material and then completely clean the affected area. Dispose of the waste properly.	

SECTION 7 – HANDLING AND STORAGE

Do not eat, drink or smoke during handling.

Avoid contact with eyes, skin and clothing. Wash arms, hands, and nails after handling. Facilitate access to safety showers and eyewash emergency. Avoid inhalation of the product. Use PPE. Keep container closed. Use with adequate ventilation. Handle containers carefully.

Use equipment and clothing that prevents the accumulation of electrostatic charges. Monitor and avoid explosive atmosfere formation.

CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:

Store in a clean, dry, well-ventilated area. Protect from sunlight. Periodically check the containers to warn of losses and breakages. Store at temperatures between 15 and 25 °C, in rooms with a waterproof and resistant to corrosion floor.

Containers, even those that have been emptied, may contain vapors. Do not cut, drill, grind, weld or perform

similar operations on or near empty containers.

Keep away from Strong oxidizing agents, acids and bases.

Material appropriate packaging: Supplied by the manufacturer.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION		
CONTROL PARAMETERS:	REL: 400 ppm, 2-propanol 200 ppm; 1-Propanol TLV-TWA (ACGIH): 200 ppm, 2-propanol TLV-STEL (ACGIH): 400 ppm, 2-propanol PEL (OSHA): 400 ppm, 2-propanol 200 ppm; 1-Propanol IDLH (NIOSH): 2000 ppm, 2-propanol 800 ppm; 1-Propanol	
EXPOSURE CONTROLS:	Keep workplace ventilated. The normal routine ventilation is usually adequate. Use local hoods for operations that produce or release large amounts of product. In low or confined areas provide mechanical ventilation. Provide showers and eyewash stations near workplace.	
PERSONAL PROTECTION EQUIPMENT, INHALATION:	When necessary, wear an organic gas or steam (A) respirator. Pay special attention to oxygen levels in the air. If large releases occur, wear self contained breathing apparatus (SCBA).	
SKIN PROTECTION:	When necessary, wear impermeable protective PVC, nitrile or butyl gloves (complying with standards EN 374), clothes and safety footwear resistant to chemicals.	
EYE AND FACE PROTECTION:	When necessary, wear chemical splash-proof safety glasses (complying with EN 166).
