SECTION IV – FIRST AID MEASURES

GENERAL ADVICE:	Avoid exposure to the product taking appropriate protective measures. Get medical advice.
EYE CONTACT:	Immediately flush with water for at least 15 minutes, holding eyelids apart to ensure that all eye and lid tissues rinsed. Washing eyes within several seconds is essential to achieve maximum effectiveness. If you have contact lenses, remove them after the first 5 minutes, then continue rinsing eye. Get medical advice.
SKIN CONTACT:	Wash immediately after contact with soap and water for at least 15 minutes. DO NOT use kerosene, gasoline or organic solvents to remove the product. Use a paper embed in kitchen oil. Remove contaminated clothing. Launder contaminated clothing before reuse. For minor thermal burns: Cool the burn. Hold the burned area under cold running water for at least five minutes, or until the pain subsides. However, body hypothermia must be avoided. Do not use ice. Do not remove clothing stuck to the skin, cut around the area.
INHALATION:	Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Keep calm. If not breathing, give artificial respiration. Get medical advice.
INGESTION:	DO NOT INDUCE VOMITING. Rinse mouth with water. Never give anything by mouth to an unconscious person. Get medical advice. If vomiting occurs spontaneously, place victim on side to reduce the risk of aspiration.
SYMPTOMS:	Inhalation: may cause irritation in case of inhalation of mists. Skin contact: may cause irritation or dermatitis in case of prolonged or repeated exposure. Eye contact: may cause eye irritation. Ingestion: may cause nausea, vomiting and diarrhea.
MEDICAL ADVICE:	Provide symptomatic treatment. For more information, contact a Poison Control Center.

SECTION V – FIREFIGHTING MEASURES

EXTINGUISHING MEDIA:	Use dry chemical, foam, sand or CO ₂ . Use the product according to surrounding materials. DO NOT USE water jets. The use of water can cause frothing, or product spillage by violent boiling of water added.
FLASH POINT:	> 93°C (200°F)
FLAMMABLE LIMITS:	N/D
SPECIAL HAZARDS:	NOT FLAMMABLE. The liquid may burn but will not ignite easily. In case of fire may release irritating and/or toxic fumes and gases, such as carbon monoxide and other substances derived from incomplete combustion.
SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS:	Use self-contained breathing apparatus. Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it may not be effective in spill situations. For large spills wear protective clothing against chemicals, which is specifically recommended by the manufacturer. It may provide little or no thermal protection.

ADVICE FOR FIREFIGHTERS:	<p>Spray the containers with water to keep them cold. Cool containers with water until the fire has extinguished. Prevent water used for fire control or dilution from entering watercourses, drains or springs. The hot material can cause violent eruptions when it comes in contact with the water, being able to project itself and cause serious burns.</p>
--------------------------	--

SECTION VI – ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:	<p>Eliminate all ignition sources (no smoking, do not use flares, sparks or flames in immediate area). Evacuate personnel to a ventilated area. Ventilate immediately, especially where product may accumulate. Do not allow reuse of spilled product.</p>
ENVIRONMENTAL PRECAUTIONS:	<p>Contain spilled liquid with a dam. Prevent entry into waterways, sewers, basements or confined areas. Hazard of significant physical contamination in case of spillage on coastlines, beaches, soil, etc. due to its floatability and oily consistency. Avoid the entry of the product into sewers and water sources. Spills form a film on the water surface not allowing oxygen transfer.</p>
CONTAINMENT AND CLEANING UP:	<p>Contain and recover the liquid when possible. Collect the liquid product with sand, vermiculite, earth or inert absorbent material and then completely clean the affected area. Dispose of the waste properly.</p>

SECTION VII – HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING:	<p>Do not eat, drink or smoke during handling. Avoid contact with eyes, skin and clothing. Wash after handling.</p>
CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:	<p>Store in a clean, dry, well-ventilated area. Protect from sunlight. Keep containers/packages closed. Keep away from Oxidizing mineral acids and strong oxidizing agents. Material appropriate packaging: Supplied by the manufacturer.</p>

SECTION VIII – EXPOSURE CONTROLS / PERSONAL PROTECTION

CONTROL PARAMETERS:	<p>REL: 5 mg/m³, oil mists REL-STEL: 10 mg/m³, oil mists TLV-TWA (ACGIH): 1 mg/m³, oil mists TLV-STEL (ACGIH): 5 mg/m³, oil mists PEL (OSHA): 5 mg/m³, oil mists IDLH (NIOSH): 2500 mg/m³, oil mists</p>
EXPOSURE CONTROLS:	<p>Keep workplace ventilated. The normal routine ventilation is usually adequate. Local hoods should be used for operations that produce or release large amounts of product. In low or confined areas should be provided mechanical ventilation. Provide showers and eyewash stations.</p>
PERSONAL PROTECTION EQUIPMENT, INHALATION:	<p>When necessary, wear an oil-proof respirator. Special attention to oxygen levels in the air should be paid. If large releases occur, wear self-contained breathing apparatus (SCBA).</p>
SKIN PROTECTION:	<p>When necessary, wear impermeable protective PVC, nitrile or butyl gloves (complying with standards EN 374), clothes and safety footwear resistant to chemicals.</p>

EYE AND FACE PROTECTION: When necessary, wear chemical splash-proof safety glasses (complying with EN 166).
